StitchGenius

StitchGenius is a sewing-embroidery combination machine. The machine includes examples of what stitches are available so users can have a better idea of what their finished project would look like. This is included in both sections of sewing and embroidery. Along with this, the sewing and embroidery process include animations during the desired activity.

Color Pallet and icons

Available Screens

Home page

Provides two options, sewing or embroidery.

Stitch Selection

Two versions are available for sewing and embroidery with differing stitches in relation to the selected process.

Sewing

Displays the current stitch in use, foot, and speed along with an animation.

Color Selection

Exclusive to embroidery, provides a list of the available colors to pick from.

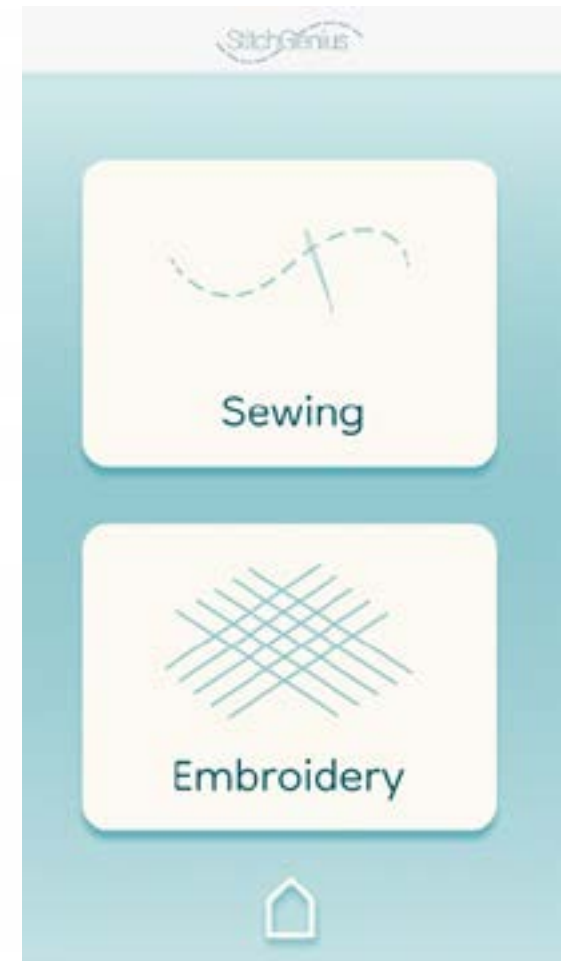

Embroidery

Displays the current stitch in use along with an animation of the progress of the embroidery.

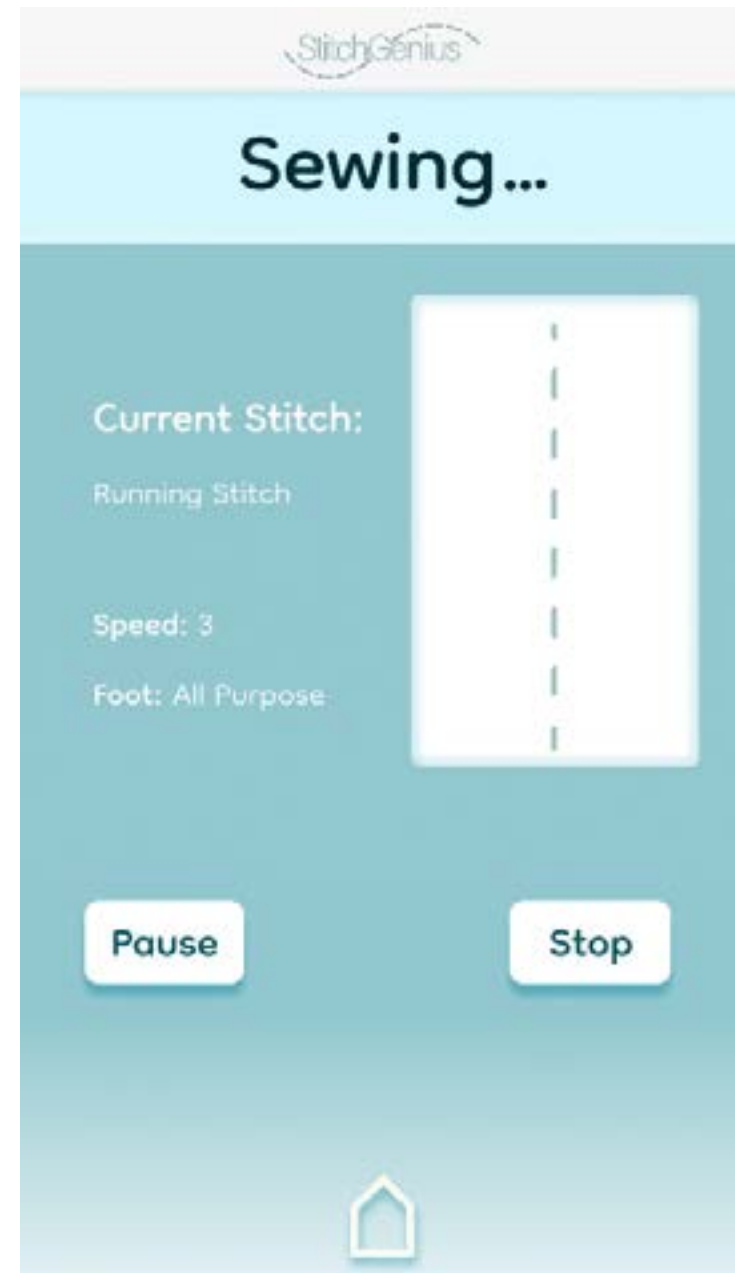

Finish Screen

Exclusive to embroidery, a finish screen that displays after the finished embroidery.
